CARBOHYDRATE RESEARCH

Subject index

Acyl migration rate
Crystal structures of (±)-1,4-di-*O*-benzoyl-2,3-*O*-iso-propylidene-*myo*-inositol and (±)-1,4-di-*O*-benzoyl-5,6-*O*-isopropylidene-*myo*-inositol: a conformational analysis 1

2-Aminoethyl phosphate
Structure of the O-specific polysaccharide of *Hafnia alvei* PCM 1222 containing 2-aminoethyl phosphate 117

Amoebocyte
Purification and characterization of a (1 → 3)-β-D-glucan-binding protein from horseshoe crab (*Tachypleus tridentatus*) amoebocytes 103

Amylopectin
Structure of the cyclic glucan produced from amylopectin by *Bacillus stearothermophilus* branching enzyme 91

aldehydo-2,6-Anhydroheptoses
Synthesis of 2-(β-D-glycopyranosyl)nitroethenes and -nitroethanes via aldehydo derivatives 57

Anion-exchange chromatography
The study of the relationship between retention and structure on D-mannose and its derivatives with high-performance anion-exchange chromatography 229

O-Antigen
Structure of the O-specific polysaccharide of *Hafnia alvei* PCM 1222 containing 2-aminoethyl phosphate 117

Bacterial polysaccharide, structure
Structure of the O-specific polysaccharide of *Hafnia alvei* PCM 1222 containing 2-aminoethyl phosphate 117

Branching enzyme
Structure of the cyclic glucan produced from amylopectin by *Bacillus stearothermophilus* branching enzyme 91

Branhamella
The structures of oligosaccharides isolated from the lipopolysaccharide of *Moraxella catarrhalis* serotype B, strain CCUG 3292 127

Burkholderia vietnamiensis
Structure of the O-specific polysaccharide from *Burkholderia vietnamiensis* strain LMG 6998 179

Cell wall
Chemical and structural features of kiwifruit cell walls: Comparison of fruit and suspension-cultured cells 195

Chemoenzymatic synthesis
Synthesis and NMR assignment of two repeating units (decasaccharide) of the type III group B *Streptococcus* capsular polysaccharide and its ^{13}C-labeled and *N*-propionyl substituted sialic acid analogues 209

Conformational analysis
Crystal structures of (±)-1,4-di-*O*-benzoyl-2,3-*O*-iso-propylidene-*myo*-inositol and (±)-1,4-di-*O*-benzoyl-5,6-*O*-isopropylidene-*myo*-inositol: a conformational analysis 1

Crystallography
Crystal structures of (±)-1,4-di-*O*-benzoyl-2,3-*O*-iso-propylidene-*myo*-inositol and (±)-1,4-di-*O*-benzoyl-5,6-*O*-isopropylidene-*myo*-inositol: a conformational analysis 1

Cultured cells
Chemical and structural features of kiwifruit cell walls: Comparison of fruit and suspension-cultured cells 195

Cyclic acetal
Crystal structures of (±)-1,4-di-*O*-benzoyl-2,3-*O*-iso-propylidene-*myo*-inositol and (±)-1,4-di-*O*-benzoyl-5,6-*O*-isopropylidene-*myo*-inositol: a conformational analysis 1

Cyclization
Structure of the cyclic glucan produced from amylopectin by *Bacillus stearothermophilus* branching enzyme 91
Cystic fibrosis
Disulfated oligosaccharides derived from tracheobronchial mucous glycoproteins of a patient suffering from cystic fibrosis 157

DAHP
A novel chemical synthesis of a 3-deoxy-D-*arabino*-heptulosonic acid 7-phosphate (DAHP) derivative and its 2-deoxy analogue 69
2-Deoxy-D-*arabino*-heptulosonic acid
A novel chemical synthesis of a 3-deoxy-D-*arabino*-heptulosonic acid 7-phosphate (DAHP) derivative and its 2-deoxy analogue 69
Dithiocarbamates
Synthesis of glycofuranosides from *S*-glycofuranosyl dithiocarbonates (xanthates) and dithiocarbamates 235
Dithiocarbonates
Synthesis of glycofuranosides from *S*-glycofuranosyl dithiocarbonates (xanthates) and dithiocarbamates 235

β-Elimination
Synthesis of 2-(β-D-glycopyranosyl)nitroethenes and -nitroethanes via aldehydo derivatives 57
Enterobacteria
Structure of the O-specific polysaccharide of *Hafnia alvei* PCM 1222 containing 2-aminoethyl phosphate 117
Exopolysaccharide
The structure of the exopolysaccharide produced by the halophilic Archaeon *Haloferax mediterranei* strain R4 (ATCC 33500) 147

Galactosyltransferase
Synthesis of octyl *O*- and *S*-glycosides related to the GPI anchor of *Trypanosoma brucei* and their in vitro galactosylation by trypanosomal α-galactosyltransferases 7
O-Glycan of core class 2
Stereocontrolled syntheses of O-glycans of core class 2 with a linear tetrameric lactosamine chain and with three lactosamine branches 25
Glycodesilylation
Synthesis of octyl *O*- and *S*-glycosides related to the GPI anchor of *Trypanosoma brucei* and their in vitro galactosylation by trypanosomal α-galactosyltransferases 7
Glycofuranosides
Synthesis of glycofuranosides from *S*-glycofuranosyl dithiocarbonates (xanthates) and dithiocarbamates 235
Glycofuranosyl donors
Synthesis of glycofuranosides from *S*-glycofuranosyl dithiocarbonates (xanthates) and dithiocarbamates 235
Glycogen
Structure of the cyclic glucan produced from amylopectin by *Bacillus stearothermophilus* branching enzyme 91
Glycosylation
Synthesis of O-glycopyranosyl heterocyclic ketene aminals and their use as glycosyl donors 77
Synthesis of glycofuranosides from *S*-glycofuranosyl dithiocarbonates (xanthates) and dithiocarbamates 235
Glycosyl bromides
Conversion of *p*-methoxyphenyl glycosides into the corresponding glycosyl chlorides and bromides, and into thiophenyl glycosides 41
Glycosyl chlorides
Conversion of *p*-methoxyphenyl glycosides into the corresponding glycosyl chlorides and bromides, and into thiophenyl glycosides 41
C-Glycosyl compounds
Synthesis of 2-(β-D-glycopyranosyl)nitroethenes and -nitroethanes via aldehydo derivatives 57
Glycosyl fluoride
Stereocontrolled syntheses of O-glycans of core class 2 with a linear tetrameric lactosamine chain and with three lactosamine branches 25
GPI anchor
Synthesis of octyl *O*- and *S*-glycosides related to the GPI anchor of *Trypanosoma brucei* and their in vitro galactosylation by trypanosomal α-galactosyltransferases 7

Hafnia alvei
Structure of the O-specific polysaccharide of *Hafnia alvei* PCM 1222 containing 2-aminoethyl phosphate 117
Haloferax mediterranei
The structure of the exopolysaccharide produced by the halophilic Archaeon *Haloferax mediterranei* strain R4 (ATCC 33500) 147
D-*arabino*-Heptulosonic acid
A novel chemical synthesis of a 3-deoxy-D-*arabino*-heptulosonic acid 7-phosphate (DAHP) derivative and its 2-deoxy analogue 69
Heterocyclic ketene aminals
Synthesis of O-glycopyranosyl heterocyclic ketene aminals and their use as glycosyl donors 77
Horseshoe crab
Purification and characterization of a (1 → 3)-β-D-glucan-binding protein from horseshoe crab (*Tachypleus tridentatus*) amoebocytes 103

Hydroxyl accessibility
Quantitative analysis of wheat starch–water suspensions by pulsed NMR spectroscopy measurements 185

Inositol
Crystal structures of (±)-1,4-di-*O*-benzoyl-2,3-*O*-iso-propylidene-*myo*-inositol and (±)-1,4-di-*O*-benzoyl-5,6-*O*-isopropylidene-*myo*-inositol: a conformational analysis 1

Kiwifruit
Chemical and structural features of kiwifruit cell walls: Comparison of fruit and suspension-cultured cells 195

Lipopolysaccharide
Structure of the O-specific polysaccharide of *Hafnia alvei* PCM 1222 containing 2-aminoethyl phosphate 117
The structures of oligosaccharides isolated from the lipopolysaccharide of *Moraxella catarrhalis* serotype B, strain CCUG 3292 127
Structure of the O-specific polysaccharide from *Burkholderia vietnamiensis* strain LMG 6998 179

D-Mannose
The study of the relationship between retention and structure on D-mannose and its derivatives with high-performance anion-exchange chromatography 229

D-Mannose derivatives
The study of the relationship between retention and structure on D-mannose and its derivatives with high-performance anion-exchange chromatography 229

p-Methoxyphenyl glycosides, synthesis and transformations of
Conversion of *p*-methoxyphenyl glycosides into the corresponding glycosyl chlorides and bromides, and into thiophenyl glycosides 41

Moraxella catarrhalis
The structures of oligosaccharides isolated from the lipopolysaccharide of *Moraxella catarrhalis* serotype B, strain CCUG 3292 127

Mucous glycoproteins
Disulfated oligosaccharides derived from tracheobronchial mucous glycoproteins of a patient suffering from cystic fibrosis 157

Nitroalkenes
Synthesis of 2-(β-D-glycopyranosyl)nitroethenes and -nitroethanes via aldehydo derivatives 57

NMR
The structures of oligosaccharides isolated from the lipopolysaccharide of *Moraxella catarrhalis* serotype B, strain CCUG 3292 127

NMR spectroscopy
The structure of the exopolysaccharide produced by the halophilic Archaeon *Haloferax mediterranei* strain R4 (ATCC 33500) 147
Synthesis and NMR assignment of two repeating units (decasaccharide) of the type III group B *Streptococcus* capsular polysaccharide and its ^{13}C-labeled and *N*-propionyl substituted sialic acid analogues 209
Isolation and characterization of an amino sugar-rich glycopeptide from the surface layer glycoprotein of *Thermoanaerobacterium thermosaccharolyticum* E207-71 245

O antigen
Structure of the O-specific polysaccharide from *Burkholderia vietnamiensis* strain LMG 6998 179

Oligosaccharide
Synthesis and NMR assignment of two repeating units (decasaccharide) of the type III group B *Streptococcus* capsular polysaccharide and its ^{13}C-labeled and *N*-propionyl substituted sialic acid analogues 209

Ozonolysis
Synthesis of 2-(β-D-glycopyranosyl)nitroethenes and -nitroethanes via aldehydo derivatives 57

Periodate oxidation
The structure of the exopolysaccharide produced by the halophilic Archaeon *Haloferax mediterranei* strain R4 (ATCC 33500) 147

Poly-*N*-acetyllactosamine
Stereocontrolled syntheses of O-glycans of core class 2 with a linear tetrameric lactosamine chain and with three lactosamine branches 25

Polysaccharides
Chemical and structural features of kiwifruit cell walls: Comparison of fruit and suspension-cultured cells 195

Prokaryotic glycoprotein
Isolation and characterization of an amino sugar-rich glycopeptide from the surface layer glycoprotein of *Thermoanaerobacterium thermosaccharolyticum* E207-71 245

Pulsed NMR spectroscopy
Quantitative analysis of wheat starch–water suspensions by pulsed NMR spectroscopy measurements 185

Retention time
The study of the relationship between retention and structure on D-mannose and its derivatives with high-performance anion-exchange chromatography 229

S-layer
Isolation and characterization of an amino sugar-rich glycopeptide from the surface layer glycoprotein of *Thermoanaerobacterium thermosaccharolyticum* E207-71 245

Starch–water interaction
Quantitative analysis of wheat starch–water suspensions by pulsed NMR spectroscopy measurements 185

Structure
The study of the relationship between retention and structure on D-mannose and its derivatives with high-performance anion-exchange chromatography 229
Isolation and characterization of an amino sugar-rich glycopeptide from the surface layer glycoprotein of *Thermoanaerobacterium thermosaccharolyticum* E207-71 245

Sulfate
The structure of the exopolysaccharide produced by the halophilic Archaeon *Haloferax mediterranei* strain R4 (ATCC 33500) 147

Sulfated oligosaccharides
Disulfated oligosaccharides derived from tracheobronchial mucous glycoproteins of a patient suffering from cystic fibrosis 157

Synthesis
Synthesis of O-glycopyranosyl heterocyclic ketene aminals and their use as glycosyl donors 77
Synthesis and NMR assignment of two repeating units (decasaccharide) of the type III group B *Streptococcus* capsular polysaccharide and its ^{13}C-labeled and *N*-propionyl substituted sialic acid analogues 209

Thermoanaerobacterium thermosaccharolyticum E207-71
Isolation and characterization of an amino sugar-rich glycopeptide from the surface layer glycoprotein of *Thermoanaerobacterium thermosaccharolyticum* E207-71 245

Thiophenyl glycosides
Conversion of *p*-methoxyphenyl glycosides into the corresponding glycosyl chlorides and bromides, and into thiophenyl glycosides 41

Trypanosoma brucei
Synthesis of octyl *O*- and *S*-glycosides related to the GPI anchor of *Trypanosoma brucei* and their in vitro galactosylation by trypanosomal α-galactosyltransferases 7

Type III group B *Streptococcus*
Synthesis and NMR assignment of two repeating units (decasaccharide) of the type III group B *Streptococcus* capsular polysaccharide and its ^{13}C-labeled and *N*-propionyl substituted sialic acid analogues 209

Wheat starch
Quantitative analysis of wheat starch–water suspensions by pulsed NMR spectroscopy measurements 185
